Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The abstract of the disclosure is objected to because in the last line the applicant recited "significant figure: figure 4". Correction is required. See MPEP § 608.01(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: the applicant should not refer to "claims" within the specification.

Appropriate correction is required.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is a lack of antecedent basis for the following: In claim 1, line 1, "the weight", line 2, "the frame" and "the case", line 3, "the free vertical side edge", line 4, "the case" and "the vertical free side edges", line 7, "the case" and "the region", line 8, 'the free side edge" and "the profiled bar", line 10, "the run-up edge" and "the weight", line 11, "the case", "the region", and "the upper side edge", line 12, "the vicinity" and "the free side edges", lines 13-14, "the upper horizontally running profiled bar", line 14, "the weight"; In claim 2, line 3, "the case", line 4, "the closing rod"; In claim 3, line 2, "the closing rod", lines 2-3, 'the lug"; In claim 4, line 2, "the closing rod", lines 2-3, "the fastening plane"; In claim 5, line 2, "the fastening plane", line 3, "the lug", "the free leg", and "L shape", line 4, "the fastening plane"; and claim 6, line 3, "the delimiting surfaces" and "the fastening surface", line 4, "the free-end". Throughout the claims, the applicant interchangeably refers to "two leaf door" and "single door" which causes both confusion and infiniteness because it is not readily apparent which of the door assemblies the applicant is referring to. In claim 1, line 4, the phraseology "or" is indefinite and fails to positively recite the claimed invention. In claim 1, lines 12-13, the phraseology "runs with its run-up slope" is not readily understood by the Examiner. In

claim 2, lines 4-5, "the latter" is indefinite and fails to positively recite the claimed invention. In claim 6, line 2, "in a trapezoidal manner" is not readily understood by the Examiner. In clam 6, lines 4-5, the phraseology "as seen from the fastening surface" is not readily understood by the Examiner.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best understood, claims 1-6 are further rejected under 35 U.S.C. 102(b) as being anticipated by Rieger et al. (6,039,364). As shown in Figure 3, Rieger et al. (6,039,364) disclose a cabinet assembly comprising a door (1) a guiding element (3, 4, 11) having a sloped surface wherein when the door is closed the weight of the door is transferred to the guiding element.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Several patents have been cited which disclose elements similar to that of the applicant's invention.

NOTE: Since the claims are not comprehensible enough to ascertain exactly what the applicant is trying to claim, a restriction in the future may be necessary. The

Art Unit: 3634

restriction would be between the single door embodiment and a double door

embodiment.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jerry Redman whose telephone number is 571-272-
